Satellite & Orbital Compute Startups (4 Grouped Core Operators): Redmond, Bellevue & Seattle

Published: November 16, 2026 · Canonical URL: https://bcesg.org/eastside-seattle-satellite-software-group/

Verification & Scope Baseline: Covers 4 core companies from BC ESG's frozen census grouped by segment/region because their standalone public ESG and facility records are thin (CLM-26).

ID	Company	Segment	WA Facility	Size Signal
WA-SPC-014	Eclipse Space	Satellite Manufacturing	Redmond, WA	Turnkey customer-owned satellite constellations
WA-SPC-036	Sophia Space	Orbital Data Centers	Seattle, WA	Raised $10M (Feb 2026); orbital compute & data center architecture
WA-SPC-060	Godel Space	Ground Systems / Software	Bellevue, WA	Edge-AI software for satellite payloads
WA-SPC-064	Avaliant	Ground Systems / Software	Bellevue, WA	Space systems engineering, constellation/FCC/ITU spectrum & LDPC

Why These Operators Are Grouped

Grouped across four thinner-record satellite and orbital-compute startups (`Eclipse Space`, `Sophia Space`, `Godel Space`, `Avaliant`) (`CLM-26`). All four hold verified WA listings in the frozen census without public SEC filings or standalone ESG reports.

Compliance & Supply-Chain Baseline

Although standalone ESG disclosures for these firms are thin, prime OEMs and DoD customers increasingly flow down Scope 3 and facility continuity checks across Tier-2 and Tier-3 suppliers (`CLM-28`).
