In-Space Servicing & Testbed Ventures (5 Grouped Core Operators): Seattle & Tacoma

Published: November 16, 2026 · Canonical URL: https://bcesg.org/in-space-servicing-research-group/

Verification & Scope Baseline: Covers 5 core companies from BC ESG's frozen census grouped by segment/region because their standalone public ESG and facility records are thin (CLM-26).

ID	Company	Segment	WA Facility	Size Signal
WA-SPC-028	Orbital Robotics	In-Space Servicing	Seattle, WA	Autonomous robotic orbital servicing
WA-SPC-029	AstroSweep	In-Space Servicing	Seattle, WA	Space debris mitigation
WA-SPC-031	gravityLab	In-Space Servicing	Seattle, WA	Spinning artificial-gravity orbital research spacecraft
WA-SPC-032	LiftPort	In-Space Servicing	Tacoma, WA	Lunar space elevator & orbital tether concepts
WA-SPC-033	SpaceRig	In-Space Servicing	Seattle, WA	Flight readiness network (mobile TVAC, propellant loading, PCB rework)

Why These Operators Are Grouped

Grouped across five thinner-record orbital servicing, debris, artificial-gravity, and testbed ventures (`Orbital Robotics`, `AstroSweep`, `gravityLab`, `LiftPort`, `SpaceRig`) (`CLM-26`). `LiftPort` operates in Tacoma (outside Batch 1–2's 10-city profile set), while the remaining four are Seattle-based.

Compliance & Supply-Chain Baseline

Although standalone ESG disclosures for these firms are thin, prime OEMs and DoD customers increasingly flow down Scope 3 and facility continuity checks across Tier-2 and Tier-3 suppliers (`CLM-28`).
