Moses Lake, WA Space Cluster Profile: Grant County Rocket Testing & Low-Flood Eastern Corridor

Published: November 16, 2026 · Canonical URL: https://bcesg.org/moses-lake-wa-space-cluster-profile/

Verification & Scope Baseline: BC ESG's frozen census records 0 core and 0 adjacent space-cluster rows in Moses Lake, WA as of 2026-11-16. Continuity exposure below reflects primary records specific to Moses Lake only.

ID	Company	Segment	Tier	Verified Facility
—	Stoke Space (Test Site; HQ in Kent)	Launch	Test Node (counted in Kent)	Grant County Int'l Airport, Moses Lake, WA

Who Is Actually in Moses Lake, WA (Frozen Census Roster)

In BC ESG's frozen census CSV, Moses Lake holds **0 headquarters or standalone company rows** (`CLM-01`). However, primary operator records confirm **Stoke Space** (headquartered in Kent) operates its dedicated rocket propulsion and cryogenic stage-testing facility at the Port of Moses Lake (`CLM-16`), making Moses Lake Washington's primary eastern propulsion test node without double-counting Stoke Space in the 67-company total.

Continuity, Flood & Freight Corridor Exposure in Moses Lake

Unlike Puget Sound's river-valley manufacturing hubs, Moses Lake sits on the semi-arid Columbia Basin plateau with very low riverine flood exposure (`CLM-13`). Documented local hazards are limited to localized convective flash flooding, irrigation canal overflow, and winter snowmelt/ice-jam runoff along Crab Creek.

The city's strategic asset is **Grant County International Airport (MWH / Port of Moses Lake)**, a former Air Force base featuring a 13,500-by-200-foot primary runway (`14L/32R`), heavy-lift flight-test infrastructure, Interstate 90 access, and Columbia Basin Railroad interchange to BNSF (`CLM-13`).

What This Means for Suppliers & Facility Compliance

Suppliers and facility managers operating in Moses Lake face two parallel compliance tracks: physical continuity planning aligned to local basin and corridor hazards, and emerging building/supply-chain reporting under Washington's Clean Buildings Performance Standard (CBPS) and downstream OEM Scope 3 supplier questionnaires (CLM-28).
