Amazon Leo (Project Kuiper) & Amazon Supply Chain Standards

Published: November 16, 2026 · Canonical URL: https://bcesg.org/wa-space-ask-amazon-leo-supplier-standards/

Verification & Authority Baseline: Buyer-published corporate standard (Amazon Supply Chain Standards, NOT law) governing labor, health & safety, environment, and ethics, paired with SEC Form SD / CMRT 6.6 conflict minerals. Binding when incorporated into Amazon Leo / Kuiper contracts.

Requirement	Authority	Deliverable
Amazon Supply Chain Standards	Buyer-published policy (PO-binding)	Signed supplier acknowledgment + EHS/labor compliance
Conflict Minerals (3TG)	SEC Rule 13p-1 + Amazon PO	RMI CMRT 6.6
Export Classification	EAR 15 CFR Part 774	ECCN 9A515 / EAR99 statement

Who Issues This Ask, Authority, and Binding Status

Amazon Leo (Project Kuiper) (headquartered and manufacturing satellites in Redmond/Kirkland) flows down **Amazon's Supply Chain Standards** alongside commercial satellite quality and export terms.

Requirement standard: Amazon's Supply Chain Standards are a **buyer-published corporate policy, not a statute**; they are **contractually binding** when incorporated into Amazon supplier agreements. Because Amazon.com, Inc. is an SEC issuer, its **CMRT 6.6** conflict-minerals requests also back its statutory SEC Form SD filing.

Evidence Required & Small-Supplier Effort Cost

Suppliers acknowledge Amazon's Supply Chain Standards (freely available labor, EHS, anti-bribery, and environment expectations), submit **CMRT 6.6** declarations for 3TG, and cooperate with buyer EHS/labor assessments if selected.

Internal audit-prep hours are **not in our data**.

WA Space Cluster Segments & Companies Affected

Affects constellation hardware, PCB, antenna, and mechanical suppliers in Satellite Manufacturing and Components & Suppliers.
