AS9100D Quality Management System & IA9100 Transition for WA Suppliers

Published: November 16, 2026 · Canonical URL: https://bcesg.org/wa-space-ask-as9100d-ia9100-quality-gate/

Verification & Authority Baseline: Published by IAQG/SAE (AS9100D). Not a statute, but contractually binding across almost all WA space primes and Tier-1s. AS9100D remains the active enforceable standard today; IA9100 (tied to ISO 9001:2026) is targeted for late 2026 / early 2027 with a multi-year transition window.

Standard	Status (Nov 2026)	Supplier Action
AS9100D	Active & enforceable today	Maintain OASIS-listed certification & surveillance audits
IA9100 (ISO 9001:2026)	Expected late 2026 / early 2027	Monitor IAQG; plan during 2-3 yr transition window
AS9120B (Distributors)	Active for aerospace stockists	Required for hardware/electronics distributors

Who Issues This Ask, Authority, and Binding Status

AS9100D certification is demanded by virtually every WA space prime—including Blue Origin, SpaceX, Stoke Space, The Boeing Company, and Aerojet Rocketdyne—via Supplier Quality Requirements (SQR) manuals and Purchase Orders.

AS9100D is an **industry standard** maintained by the International Aerospace Quality Group (IAQG) and SAE International, not a government regulation; it is **contractually binding** as a hard gate to Approved Supplier List (ASL) onboarding. **AS9100D remains the active, enforceable standard today.** IAQG is rebranding the next revision to **IA9100** (aligned with ISO 9001:2026, expected late 2026 / early 2027) with a formal multi-year transition period.

Evidence Required & Small-Supplier Effort Cost

Suppliers satisfy the ask by presenting an active **AS9100D certificate** listed in the IAQG **OASIS** database from an accredited Certification Body (or passing a prime's second-party quality audit if grandfathered for prototype/R&D work).

Registrar audit fees and QMS consulting costs vary by headcount and scope and are **not in our data**.

WA Space Cluster Segments & Companies Affected

AS9100D is the baseline gate across Components & Suppliers (Space Valves, Janicki Industries, Electroimpact, Xanfab, PacAero) and Launch.
